WYATT'S "WONDERLAWN" LAWN GRASS FOR AMERICA'S FINEST LAWNS

BUILDING A PERMANENT LAWN

Harrow or rake the surface to the finest possible condition and roll until all elevations and depressions have been removed. Rake the seeds in lightly, following with a roller, a firmly rolled surface being absolutely necessary; small areas may readily be packed firm by the back of a spade. In the South we often have trouble in getting good lawns because it has been found that no one grass will give satisfactory results at all seasons and on all soils. By the use of WYATT'S "WONDERLAWN" LAWN GRASS SEED a rich, velvety lawn can be made and maintained. One pound will sow a space 10 by 20 feet or 200 square feet. 75 to 90 pounds to an acre.

WYATT'S "WONDERLAWN" LAWN GRASS

You will find something different in this Wyatt's "Wonderlawn" Lawn Grass and as the name implies it will produce a wonderful lawn and give entire satisfaction in the Southern States. It is a properly blended mixture of grasses adapted to our Southern soil and climate. All the grasses used in this "Wonderlawn" mixture are field ripened, sun cured and double processed. By double processed we mean that all the weed seeds, chaff, dirt and other impurities have been removed.
